

## FlexControl by Vicomtech

<p>Picture</p>	
<p>Brief Description</p>	<p>FlexControl is a web-based tool that allows the orchestration of content in C&amp;C centre</p>
<p>Main Functionality</p>	<p>FlexControl is an application for content orchestration (videos, images, data) in real time between multiple users, who have several devices in different geographical locations wirelessly. FlexControl is designed to provide a common experience, improve collaborative decision-making in geographically distributed teams in real time and reduce response times, improving decision-making efficiency.</p>
<p>Main Capabilities</p>	<p>This application can ingest content from different sources, with a heavy focus on video. For example, CCTV, body worn cameras, smartphone cameras or cameras mounted in drones can be ingested. Furthermore, FlexControl can also be used for screen-sharing.</p>
<p>Use Case (s)</p>	<p>The tool can be used in any emergency use case where multiple video and screen sources are used.</p>
